3700 Perkiomen Ave.
Reading, Pa. 19606

January 30, 2006

Dear Mr. Kase,

St. Mary's new Religious Education Center has turned out to be a very functional building accommodating our parish needs and many other groups that meet at our facility. From very early in the conception and planning of the building and revision of our plot plan you and AEM Architects have been most helpful and practical. The location of the building on our property seems to work very well with the other buildings and our over all property, leaving room for future expansion of the education building and space for future expansion and out-door activity.

In building an educational facility there are many special pieces of equipment and details that need attention. You and AEM Architects are knowledgeable and were able to provide the guidance and expertise we needed as our project developed.

Your knowledge of the contractors and trades persons was also very helpful in choosing a contractor. After the bids were returned your handling of the bidding process was efficient and professional which resulted in a fair price and the selection of a contractor capable of providing the envisioned building according to the specified drawings.

Your professional approach to the project gave our committee a sense of confidence as we moved ahead with the project. There was a sense of satisfaction and comfort as we moved in and through the project. Drawings and revised plans were always provided in a timely fashion. Phone calls were answered respectfully and in a reasonable amount of time.

I would recommend you and AEM Architects to others who are anticipating building an educational facility for the various reasons stated above.

Sincerely yours,

Rev. Msgr. Walter T. Scheaffer
Pastor
